

Enhancing Resilience of Communities in Solomon Islands to the Adverse Effects of Climate Change in Agriculture and Food Security

Description

Objective: The project implemented by the [United Nations Development Programme \(UNDP\)](#) is working to strengthen ability of communities in the Solomon Islands to make informed decisions and manage likely [climate change](#) driven pressures on food production and management systems. First, the project plans to promote and pilot community [adaptation](#) activities that enhance [food security](#) and livelihood resilience in pilot communities on the windward and leeward sides of the main islands and on the artificial islands of Langalanga and Lau lagoons on the leeward side of Malaita Province. The project also aims to adjust national and sub-national [policies](#) related to governing [agriculture](#) to take [adaptation](#) into consideration and to foster the generation and diffusion of knowledge on adapting to [climate change](#) in a systematic manner at the community and regional levels.

Project Status

Completed

Start Date

Tuesday, June 28, 2011

End Date

Sunday, June 28, 2015

Duration

4 years

Project Type

Field Implementation
Knowledge Communication
Pilot / Trial / Demonstration Project
Policy Support

Total Funding

5,533,500

Donor Currency

USD

Project Scope

Community
National
