

Umbrella Programme for National Communication to the UNFCCC

Description	PDF version or type unknown
<p>The project will provide financial and technical support for the preparation of National Communications (NCs) to the United Nations Framework Convention on Climate Change (UNFCCC) in 14 non-Annex I Parties that have completed preparation of their current national communications. The proposed project will seek to strengthen the information base and institutional capacity of the national institutions involved in the development of national communications in order to integrate climate change priorities into development strategies and relevant sector programs. The project will ensure that countries not covered under the current National Communications umbrella project under GEF-4 , and which seek support from UNEP will have expedited access to financial resources for their National Communications. It will also ensure continuity in the strengthening of national capacities and institutional mechanisms for the preparation of National Communications by building on previous achievements and addressing gaps.</p>	

Project Status	Current
<h3>Implementing Countries</h3>	
Solomon Islands Fiji Tuvalu Niue
