

Climate Risk & Early Warning Systems Pacific SIDS Project (CREWS)

[PDF version](#) or type unknown

Description

The project will focus on building the capacity of communities to apply the rich information produced by the National Meteorological Services (NMHSs) on an hourly, daily to monthly basis for decision making. Surveys carried out by the Finland-Pacific (FINPAC) project showed that while the NMHSs regularly produce a number of very informative and useful products, there is very little uptake and use of these information by the community. While the CB-EWS/DRR is a concept that is focused on working with communities to build their capacity, support is also required at the regional and national level to setup [policies](#) and or trainings to enable information to be developed and disseminated to communities.

Project Status

[Current](#)

Start Date

Friday, March 1, 2019

End Date

Friday, December 30, 2022

Short Title

CREWS

Project Type

[Capacity Building](#)
[Community Awareness](#)
[Disaster Response](#)
[Knowledge Communication](#)

Project Scope

[Regional](#)

Implementing Countries

[Cook Islands](#)
[Federated States of Micronesia](#)
[Fiji](#)
[Kiribati](#)
[Marshall Islands](#)
[Nauru](#)
[Niue](#)
[Palau](#)
[Papua New Guinea](#)
[Samoa](#)

Solomon Islands
Tonga
Tuvalu
Vanuatu

Implementing Organisation(s)

Secretariat of the Pacific Regional Environment Programme (SPREP)
The Pacific Community (SPC)
World Meteorological Organisation (WMO)

Implementing Organisation Contact(s)

Pacific Meteorological Services

Topics

Climate Change

Focus Area

Sustainability
Planning
Vulnerability assessments
Monitoring
Best practice guides
