

Developing the Capacity to Better Predict the Composition of Reef Communities in a Future of Intensifying Climate Change Based on the Analysis of Symbodinium Communities

Description

Project Status

[Completed](#)

Start Date

Sunday, January 17, 2021

End Date

Sunday, January 17, 2021

Project Type

[Capacity Building](#)

Project Scope

[National](#)

Project Objectives

1) Examine the impact of [climate.change](#) on coral reef communities in the National Park of American Samoa.
