

# Synergistic Impacts of Global Warming and Ocean Acidification on Coral Reefs

Project Status [Current](#)

Start Date Wednesday, January 30, 2013

End Date Sunday, June 30, 2019

Project Type [Capacity Building](#)  
[Field Implementation](#)

Project Scope [Regional](#)

**Project Objectives** This project develops equations describing changes in coral growth rates in [response](#) to increased temperature and [ocean acidification](#). These data are necessary for developing and refining models evaluating the future impact of [climate change](#) on Pacific coral reef communities. Results will help define appropriate management responses and prioritize interventions at the most vulnerable sites.

## Implementing Countries

[Northern Mariana Islands](#)  
[Federated States of Micronesia](#)  
[Guam](#)  
[Palau](#)  
[Marshall Islands](#)  
[Cook Islands](#)  
[French Polynesia](#)  
[Kiribati](#)  
[Papua New Guinea](#)  
[New Caledonia](#)  
[Solomon Islands](#)  
[Tokelau](#)  
[Tonga](#)  
[Tuvalu](#)  
[Vanuatu](#)  
[Nauru](#)  
[Niue](#)

Wallis & Futuna
