

Simple Well Improvement

Description

[PDF version](#) or type unknown

Project Status [Proposed](#)

Start Date Thursday, October 21, 2021

End Date Thursday, October 21, 2021

Project Type [Capacity Building](#)

Total Funding 347000

Project Scope [Community](#)

Project Objectives Reduce the burden of diarrhoea and other [water](#)-related diseases and problems particularly among very young and old people in Kiribati. This will be achieved by improving over the period of three years, 500 ground [water](#) wells that are used by communities for their drinking and cooking.

Project Outputs 1) 500 ground water wells are protected;

Project Activities Activities:
1) Cements, polythene, "Tamana hand pumps", and moulds for wells will be provided. Environmental Health senior officials of the MHMS will introduce the project to each of the outer islands local councils, and work with island based sanitarian aides, water technicians, and the village welfare groups to implement the project.
