

Pacific Islands Climate Prediction Project (Phases 1 and 2)

Description	PDF version or type unknown
Project Status	Completed
Start Date	Thursday, July 7, 2022
End Date	Thursday, July 7, 2022
Short Title	PI-CPP
Project Type	Research Capacity Building
Total Funding	3000000
Project Scope	Regional
Project Objectives	The project aimed to expand understanding how seasonal climate prediction services can be applied to support climate -sensitive decision making and the use of climate predictions by National Meteorological Services and industries/agencies which use climate information (e.g. farmers, tourism , water resource managers and health authorities). Along with the provision of software tailored to local circumstances and training in the effective use of climate predictions in a risk management context, the project undertook specific pilot activities.
