

# Capacity Building for the Development of Adaptation Measures in Pacific Island Countries Project

Description	<a href="#">PDF version</a> or type unknown
<p>The <a href="#">Capacity Building</a> for the <a href="#">Development</a> of <a href="#">Adaptation Measures</a> in Pacific island countries (CBDAMPIC) project focuses on improving the livelihood of Pacific Island people by increasing their adaptive capacity to <a href="#">climate</a>-related risks. This is Canada's <a href="#">response</a> to the call by Pacific island countries for assistance to develop and implement a <a href="#">capacity building</a> programme that will reduce <a href="#">climate</a> related risks at the national and community level. The CDN 2.2 million-dollar initiative of the Canadian <a href="#">Development</a> Agency (CIDA) is executed by SPREP for three-years (January 2002 to March 2005) and involves four countries: Cook Islands, Fiji, Samoa and Vanuatu.</p>	
Project Status	<a href="#">Completed</a>
Start Date	Tuesday, January 1, 2002
End Date	Friday, June 30, 2006
Duration	36
Short Title	CBDAMPIC
Project Type	<a href="#">Capacity Building</a> <a href="#">Planning and Governance</a>
Total Funding	2200000
Project Scope	<a href="#">Community</a>
Project Objectives	<p>The purpose of the project is to develop and implement a <a href="#">capacity building</a> programme that will increase the capability of four Pacific Island countries' to reduce <a href="#">climate</a>-related risks at the national and community level. The two main project outcomes: First, the activities of the project will bring <a href="#">adaptation</a> to <a href="#">climate change</a> into the normal processes of national and sectoral <a href="#">planning</a> and budgeting. This is also known as 'mainstreaming'. Secondly, the project will increase the capacity of communities to adapt to <a href="#">climate</a>-related risks and reduce their vulnerabilities.</p>

Project Outputs 1) Policy/decision makers will be more aware of the threat of climate change to their people's livelihoods and economic sectors. They will also understand the options that could be put in place at national & community level to increase adaptive capacity.
