

Pacific Risk Resilience Programme

Description

PRRP is led by government agencies and also involves private sector in four participating countries - Fiji, Solomon Islands, Tonga and Vanuatu. It is delivered through a partnership between UNDP Pacific Centre and the international Non Government Organisation (NGO) Live and Learn Environmental **Education** (LLEE), with support from the Australian Government. It is a five year Programme with a total budget of US\$14.3million (AUD\$16million) and is due to finish activities in July 2018.

Project Status [Completed](#)

Start Date Thursday, May 1, 2014

End Date Monday, January 1, 2018

Short Title PRRP

Project Type [Disaster Response](#)
[Other](#)

Project Scope [Regional](#)

Project Objectives PRRP works with Pacific Island nations and their people to consider the risks they face from **climate.change** and disasters and include those risks in their usual plans for **development**. Communities can become more resilient to **climate.change** and disasters if routine government, community and other **planning** takes these risks into account. This risk **governance** approach is delivered through a partnership between the **United.Nations.Development** Programme (UNDP) and international non-government organization Live & Learn Environmental **Education** (LLEE), and supported by the Australian Government. PRRP is being delivered in four countries: Fiji, Solomon Islands, Tonga and Vanuatu. The purpose of the Programme is that governments, civil society and communities in trial locations, and in accordance with their unique contexts, identify risks and needs and formulate, and in some cases implement socially inclusive, effective and sustainable responses. The goal of the Programme is the long-term vision that communities are more resilient to risks from **climate.change** and disasters.

The end of programme outcomes (EOPO) for the programme and the associated structure are: EOPO 1: CCDRM considerations are integrated into coherent cross-sectoral development planning, budgeting and performance frameworks.

- 1.1: National Development Planning

- 1.2: National Disaster Management Planning (preparedness and recovery)

- 1.3: Private Sector Engagement EOPO

2: Participating Countries integrate CCDRM considerations into sub-

Activities:

A small sample of the PRRP-supported Risk Governance activities across the 4 target countries include (more activities detailed below in 'Links' for (a) Country Briefs and (b) Fast Facts):

1. Facilitated establishment of the Recovery Coordination Committee (RCC), with a new post created to support the RCC and development of a Recovery Action Plan for the 2014 April floods (in
