

INSTITUTIONAL

INSTITUTIONAL	
Support from different sectors to meet timeframe of expected deliverable	<ul style="list-style-type: none"> • Inclusive planning process • Political mainstreaming
Updating the CHICCHAP work plan & reporting against the work plan to be strengthened (SOL)	Streamlining NGO's & partners to National Development Plan of the government to avoid duplication
Limited staff funding and other priorities of government agencies makes regular community monitoring challenging (SOL)	Brief MP's through courtesy visits and updates to get political support and funding allocated for the Province
No permanent climate change staff in Office of the President (KIR). Staff, project support; dependent on projects to continue funding	The National Focal Point (NFP) would prefer that before any decisions are made, the NFP must be consulted. Similarly, the NFP also has to take the lead informing partners of decisions made in meetings
CC & disaster coordination needs to be strengthened (KIR)	Manage resources <ul style="list-style-type: none"> - more awareness - downscale awareness - highlight economic viability and social benefits
Communication & collaboration between all partners to be strengthened	Improve information accountability and feedback
Manage relationship btw resource owners and agencies that manage resources	M&E framework put in place – align and feed national M&E frameworks
OB does not have M&E f/wk to monitor all project activities & KJIP (KIR)	Increase manpower to monitor KJIP implementation and draft CC Policy

ADMIN & FINANCE

ADMINISTRATION & FINANCE	
Whole of Island Approach – aligning/coordinating financing amongst development partners (KIR)	<ul style="list-style-type: none"> • Harmonise finance and reporting • Stocking taking of PRM and donor support in country – contribution to trust in our systems
Lengthy process in terms of mobilising funds (KIR)	<ul style="list-style-type: none"> • Project financial process to be incorporated into government financial system • Harmonise donor process with government process (KIR) • Capacity building
CCDA Adaptation division coordination commitment (PNG)	More hands on approach of focal point allocation of a dedicated officer

TECHNICAL

TECHNICAL	
Different partners have different work plans/schedules	<ul style="list-style-type: none"> • Holistic integrated planning • National synergy to plan and decide on deliverables
Engaging partners is sometimes difficult and causes delays in implementation	
Technical expertise at subnational level is not available	<ul style="list-style-type: none"> • Recruitment of staff – develop specific TORs • Build local capacity • Providing educational resources • Training and capacity building to District / subnational level
Stretched capacity to provide support to all projects	
No knowledge centre to store technical data and information in country (SOL)	Develop a knowledge centre under CCCPIR at the country level
Misunderstanding on community level of holistic approaches as projects	<ul style="list-style-type: none"> • Community awareness is vital • Mobilisation of communication prior, during and after-raise awareness

DISCUSSION

- Identify challenges that are related to your countries
- Any progress?
